*LiveNapalm Media*

**Photographer**

Tacoma, WA

April 2023 – Feb 2026

- Professional photographer documenting the heavy metal scene in the Pacific Northwest
- Photographs published by *Decibel* and *Metal Injection*

*AmpliFi Loyalty Solutions*

**Software Developer Intern**

Naperville, IL

May 2019 – Aug 2019

- Developed updates for a SaaS financial rewards web app (**JavaScript / Java Spring**)
- Cleared a year of tech debt in one month via testing (**JUnit**), algorithm simplification (**Java / C#**), and **SQL** validation

*Embry-Riddle Aeronautical University*

**Software Developer**

Daytona Beach, FL

Nov 2014 – May 2017

- Developed research applications for Human Factors studies that were published in peer-reviewed journals and presented in-person at research conferences (**MATLAB**)
- Designed simulations in Arma 3 for published studies researching team performance

## Projects

### Personal Website

[fahey.vip](https://fahey.vip)

Designed and built a static-first personal portfolio platform with Astro, TypeScript, and **Cloudflare** Pages, creating a structured content architecture, friendly UX, SEO support, accessibility guardrails, and Node-based regression tests backed by CI/CD. I used the BMAD planning workflow to drive the project from product requirements, and I incorporated AI-assisted development with **OpenCode**, **vLLM**, Cursor, and Codex to accelerate delivery, improve decision quality, and demonstrate a modern, agent-enabled engineering workflow.

### LiveNapalm Website

[livenapalm.com](https://livenapalm.com)

Built and migrated a modern concert photography portfolio with Next.js, **React**, TypeScript, and Tailwind CSS, statically exporting a responsive gallery to Cloudflare Workers. Designed a markdown-based content system that combines authored photo posts with a checked-in Flickr album manifest, dynamic sitemap/metadata support, lazy-loaded image grids, keyboard/touch photo navigation, EXIF display plumbing, and an accessible mobile-first UI.

### Castaway Fishing

[castawayfishing.net](https://castawayfishing.net)

Built and rapidly deployed a browser-based fishing game with TypeScript, Vite, and BabylonJS, using frontier AI tools including OpenCode and **Hermes** within **VS Code** to accelerate implementation while manually driving playtesting, gameplay tuning, system simplification, and **creative direction**. Features include dynamic water biomes, physics-based reeling, weighted fish spawning, dozens of species, progression unlocks, responsive desktop/mobile controls, and client-side autosave. Deployed to Cloudflare Pages with CI/CD via GitHub.

## Publication

### *Combat Identification in Mixed Gender Teams*

*Co-Author*

#### **Proceedings of the HFES 2017 Annual Meeting, Sept. 2017, pp. 2005 - 2009**

Co-authored and published a research paper analyzing the effects of team gender composition on ability to identify combat vehicles. I developed research assessment applications using MATLAB, created virtual training environments in Arma 3, and individually trained human participants on armored vehicle aesthetics.
